

Hi there!

Thank you for downloading our demo files, created 100% with [SvGator](#).

Design custom animations and discover all export options:

- SVG (CSS only)
- SVG (with Java Script) interactivity support (on click, on mouse over, scroll)\*
- Dart file for Flutter framework
- JS file for React Native
- Video (mp4, mov, webm, avi, mkv). Render transparent 4k videos, @60 fps.
- Animated GIF
- Animated PNG
- Animated WebP
- Image sequence

\* Get full control over the interactivity with our Player JS API. [See demo](#).

## What's included

- Animated GIF
- Animated PNG - open this in a web browser to see the animation
- Animated WebP - open this in a web browser to see the animation
- PNG sequence (zip file of individual frames)
